## 10 Cents and Worth It!

### *The Price of Excellence*

In these days the increase in the price of a publication is for three very definite purposes:

First, to meet the increase in the cost of white paper—which has more than doubled—and to meet the wage scales of labor, which are very properly increasing on account of the continually growing cost of living.

Second, to give the agents who sell the publica-

tions—namely, the newsboys and dealers—a larger item of profit, which they, in their turn, thoroughly deserve.

Third, to make a continually better publication for the benefit of our readers.

We know that our publications are amply worth what we charge for them, and we are glad to see that the public knows that, too.

WILLIAM RANDOLPH HEARST.
